Built on solid foundations.

For over four decades, KWP has been one of the world’s leading manufacturers of premium building products. We are committed to continuing to refine business strategies and activities that meet the needs of the enterprise today. KWP is dedicated to protecting, sustaining and enhancing natural resources that will be required in the future.

The wood we use to manufacture our Eco-side® collection contains 100% pre-consumer recycled content. KWP products are Eco-consciously manufactured with quality additives that increases strength, rigidity and durability while lessening our carbon footprint.

Easy to work with and stunning to look at, Eco-side® siding and trims are fit for any design.

Stratford Vertical Siding & Soffit

Elevate your home’s exterior by adding the luxury and warmth of engineered wood soffits. The perfect complement to your siding.

Stratford’s primary application is as a soffit panel, however, it can also be used as siding and can be installed horizontally, vertically or diagonally.

No matter how it’s used, it will add tremendous curb appeal to any home.

For the most accurate color representation, please use official KWP color chips.

Venting Strip
Provides a continuous air flow to provide superior ventilation under the soffit

Install Horizontally or Vertically

Enhance the beauty of any home design.

At KWP, we take pride in delivering a low-maintenance, esthetically pleasing product. Our painting process plays a huge role in providing the authentic look of wood without any of the upkeep.

Here’s our secret:

- A sealant is applied at the pressing of the panel, ensuring superior adhesion between our first coat of primer and the substrate.
- Next, we have our 3-coat painting process: 1 coat of primer and 2 top coats. We use an industrial exterior latex paint, formulated specifically for our application process.
- State-of-the-art temperature controlled air drying equipment is used versus oven-baked. We do this to maintain the maximum level of flexibility of the paint. This is key to avoid damages to the paint film.

KWP Technology at a Glance

- Building green is easy with Eco-side®. Using 100% recycled content, Eco-side® is FSC certified and can contribute points to LEED projects.
- Resistant to termite damage, rotting, cracking and splitting, Eco-side® is engineered to last.
- Using state-of-the-art engineering and manufacturing techniques, Eco-side® is 50% lighter than fiber cement siding, making the panel easier than ever to handle.
- Available in 6" and 8" widths* with a 3/8" thickness. Length available in Eco-side® is 12' and Eco-side® smooth in 13'4". *
- Once installed, Eco-side® nail hem is covered, eliminating the need for painted nails and ensuring a fresh clean look all around.
- Upside down or right side up, Eco-side® can be installed however you please.

* Not all colors are available in both sizes
